YOGESWARACHARY MODEPALLI

Data Science Professional | Fraud Analytics | Machine Learning

Hyderabad, India | +91 9676106803 | myogeswarachary@gmail.com
LinkedIn: linkedin.com/in/yogeswarachary-modepalli | GitHub: github.com/Yogeswarachary

PROFESSIONAL SUMMARY

Detail-oriented data science professional with hands-on experience in fraud detection, predictive modeling, and statistical analysis. Proven track record of building end-to-end machine learning solutions deployed via Streamlit applications. Strong foundation in Python, data visualization, and hypothesis testing. Passionate about leveraging data-driven insights to solve real-world business problems. Seeking entry-level Data Scientist opportunities in dynamic startup environments.

TECHNICAL SKILLS

Programming & Tools: Python, SQL, Git, GitHub, Streamlit, Jupyter Notebook, VS Code
Machine Learning: Scikit-learn, Pandas, NumPy, Feature Engineering, Model Validation, Hyperparameter Tuning
Data Visualization: Matplotlib, Seaborn, Plotly, Power BI
Statistical Analysis: Hypothesis Testing, A/B Testing, Regression Analysis, Time Series Analysis
Concepts: Fraud Detection, Classification, Clustering, Natural Language Processing, Deployments

PROJECTS

JPMorgan Chase Fraud Detection System | Python, Scikit-learn, Streamlit
Built an end-to-end fraud detection pipeline analyzing transaction patterns to identify suspicious activities. Implemented multiple classification algorithms including Random Forest, XGBoost, and Logistic Regression. Achieved high precision in fraud prediction with proper handling of class imbalance using SMOTE. Deployed interactive web application for real-time fraud prediction.

Financial Fraud Mitigation Research - India FY 2024-2025
Conducted independent research analyzing fraud trends, patterns, and mitigation strategies across Indian financial institutions. Authored comprehensive research paper with data-driven insights on emerging fraud typologies and prevention frameworks. Published findings with actionable recommendations for financial sector stakeholders.

Research Paper: yogeswarachary.github.io/Financial-Fraud-India-2024-Research

Cookie Cats Game A/B Testing Analysis | Hypothesis Testing, Python
Performed rigorous A/B testing to evaluate player retention metrics for mobile game optimization. Applied statistical tests including t-tests, chi-square tests to validate hypothesis about gate placement impact on user engagement. Created interactive Streamlit dashboard for stakeholders to explore results.

Live App: cookiecatsgamehypothesistesting.streamlit.app

DHL Inventory Optimization Project | Demand Forecasting
Developed inventory management solution using time series analysis and demand forecasting techniques. Implemented inventory optimization algorithms reducing stockout risks while minimizing carrying costs. Built automated reporting dashboard for supply chain visibility.

Live App: yogeswarachary-dhl-inventory-project.streamlit.app

ML Trading Algorithm | Quantitative Finance
Designed and implemented machine learning-based trading strategy using historical market data. Applied feature engineering on technical indicators and trained models for price prediction. Backtested strategies and deployed via interactive Streamlit application.

Live App: mltradingproject.streamlit.app

AutoDoc - Automated Documentation Generator | NLP
Built automated documentation tool leveraging NLP techniques to extract and summarize code documentation. Created user-friendly interface for developers to generate comprehensive README files.

Live App: autodoc.streamlit.app

PROFESSIONAL EXPERIENCE

Student Visa Process Executive | Gateway Visas & Immigration Consultancy
August 2024 - September 2025 | Hyderabad
Streamlined visa application workflows, reducing processing time by efficiently managing documentation and compliance requirements. Applied analytical thinking to identify process bottlenecks and implement data tracking improvements.

Process Analyst - Student Visa | LaGlobal Overseas Edu
May 2023 - July 2024 | Hyderabad
Analyzed process efficiency metrics and optimized workflow for student visa applications. Maintained detailed tracking systems for application status monitoring. Collaborated with cross-functional teams to ensure compliance.

Admissions Expert | Flywise Overseas Edu
January 2023 - April 2023 | Hyderabad
Managed student admission processes with focus on data accuracy and documentation. Developed systematic approaches for application tracking and status reporting.

Java Developer Intern | Pratian Technologies
June 2022 - September 2022 | Hyderabad
Developed and tested Java applications following software development best practices. Gained foundational experience in object-oriented programming and agile development methodologies.

EDUCATION

Bachelor of Technology - Computer Science Engineering
Jawaharlal Nehru Technological University, Hyderabad | June 2017 - November 2020

CERTIFICATIONS

- Accelerator Business Analytics and Data Science Program - HeroVired
- HarvardX - Introduction to Data Science with Python - edX
- Generative AI for Data, Tech & Finance - April 2025

KEY STRENGTHS

- Strong analytical mindset with ability to translate business problems into data solutions
- Experience building and deploying production-ready ML applications
- Self-driven learner with portfolio of diverse data science projects
- Excellent communication skills for presenting technical findings to non-technical stakeholders
- Adaptable and quick learner, proven by successful transition from operations to data science
